Recommendation letter

To whom it may concern:

I am pleased to strongly recommend Mr. Ángel Hiram Alvidrez Hernández, who is applying for an international academic and research program at the Lublin University of Technology, Poland. Mr. Alvidrez is currently an undergraduate student in his final semesters of the Mechatronics Engineering Program at this institution, the Universidad Autónoma de Ciudad Juárez.

I first met Mr. Alvidrez two years ago as a dedicated student in my course, "Analysis of Mechanisms," and later in my course, "Motors and Controllers." The latter is an advanced-level subject focused on actuator modeling, real-time control, and the experimental validation of dynamic systems. During this course, Mr. Alvidrez exhibited remarkable skills in mathematical analysis, control algorithm implementation, and the integration of hardware and software for the motion control of underactuated bipeds.

Mr. Ángel Alvidrez is an outstanding student who shows impressive self-motivation and commitment to the engineering field. His collaboration with our laboratory team during classwork and project development was exemplary, reflecting his respectful and cooperative nature. Over the course period, he refined his skills in C/C++ Linux programming, embedded operating systems, and computational simulations, applying a variety of numerical methods to advance mobile robot control.

I firmly believe that Ángel possesses the ideal profile to participate in international academic and research programs. I am confident that, with his initiative, commitment, and capacity for learning, as well as the guidance of a skilled academic advisor, Mr. Ángel Alvidrez will make a significant contribution to the academic and scientific collaboration between both institutions.

Please feel free to reach out for any additional information regarding his application.

Sincerely,

Dr. Edgar A. Martínez-García (PhD Eng)
Full Professor, Head of the Robotics Laboratory
Institute of Engineering and Technology, Universidad Autónoma de Ciudad Juárez
